INTERIORES

technique harmony shine

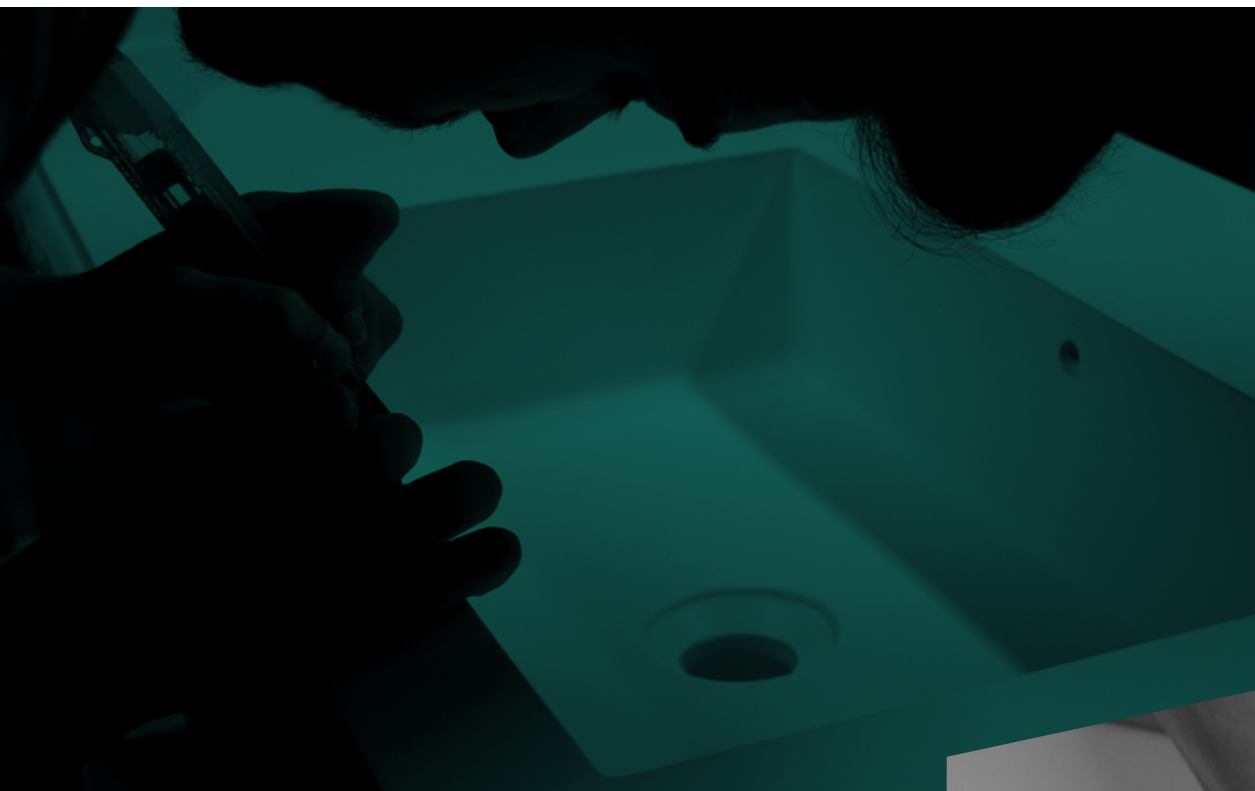

Bagno Interiores is a specialized manufacturer of bathroom and kitchen fixtures and surfaces.

The company uses new synthetic marbles with simple and luxurious designs. The company offers precisely made, custom products at exclusive and affordable prices.

Bagno has a large portfolio of products which includes shower trays, wash basins, and decorative wall-tiles. Bagno Interiors combines top quality materials and minimalistic designs with high performing glossy surfaces.

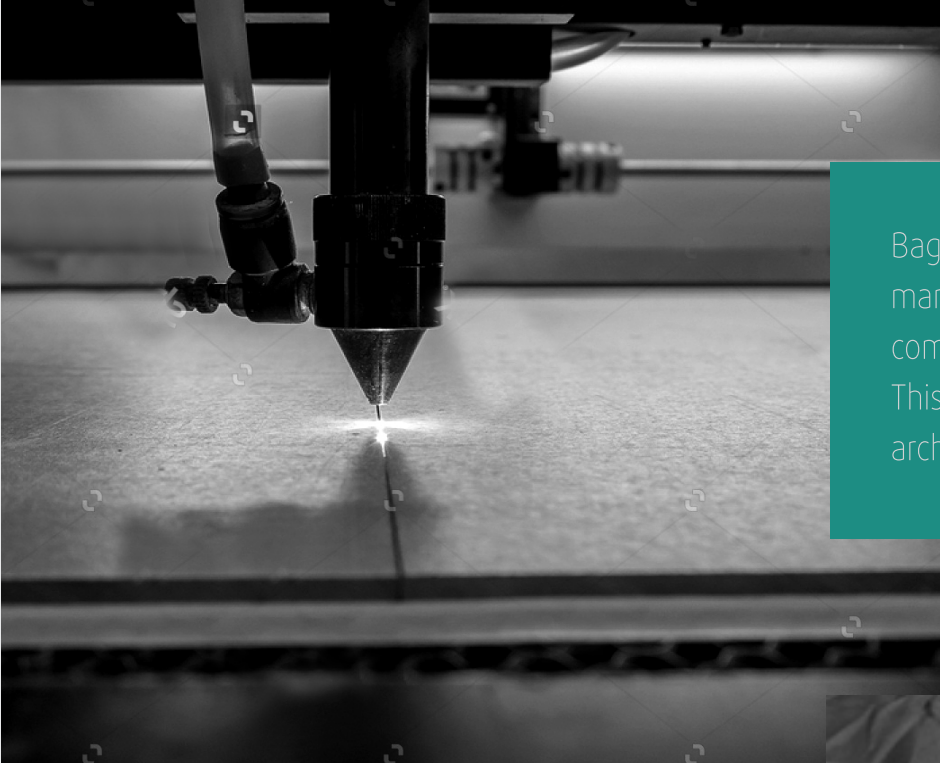

Bagno Interiores is well positioned in the international market through a combination of advanced technology and elegant designs driven by an intimate understanding of human experience.

Bagno Interiores unites a dedication to hand-crafted detail with a passion for leading-edge technology. The result are unique products with **harmonious design lines** and **the glossiest finish**. This creates a strong value-add, clearly differentiated from any other products currently in the marketplace.

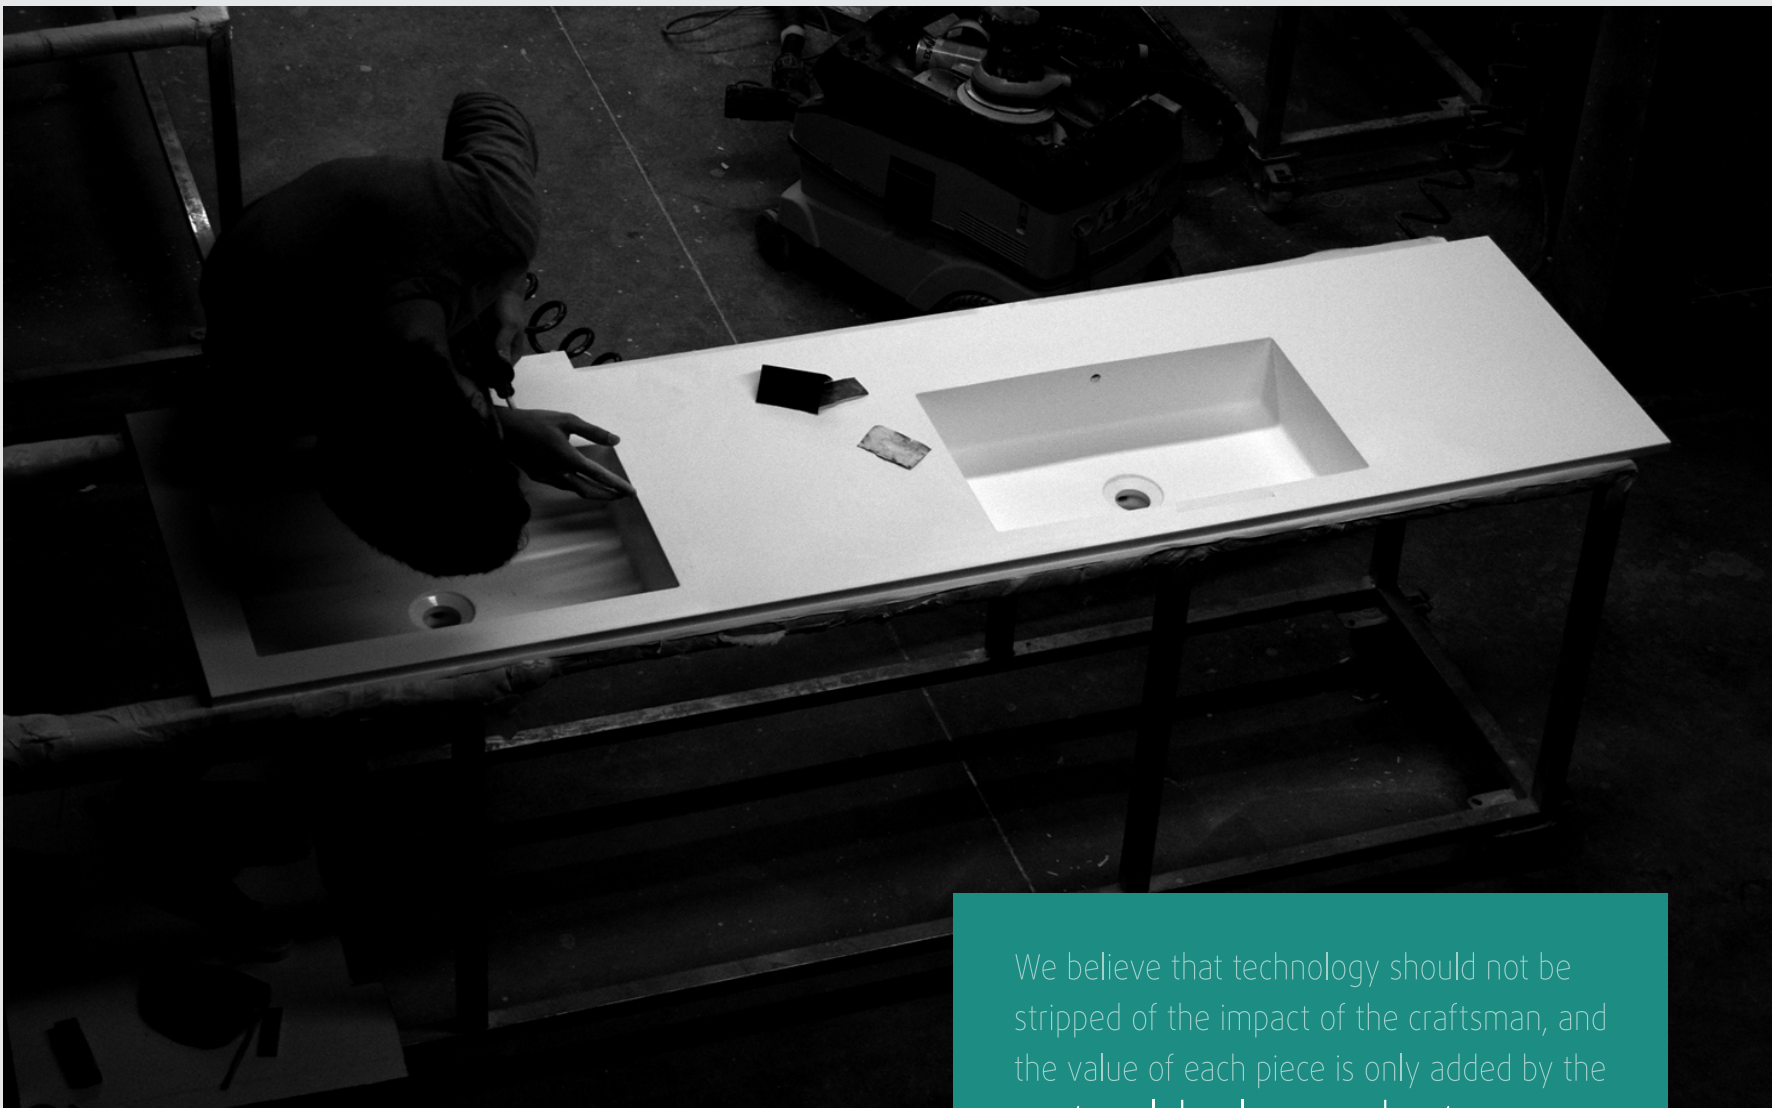

Bagno Interiores has a proprietary manufacturing process which allows complete customization of each product. This allows for the precise combination of architectural lines and construction strength.

Each product results in a jointless monoblock, customisable and adaptable, since its conception to the multiple colour finishing.

We believe that technology should not be stripped of the impact of the craftsman, and the value of each piece is only added by the actual balance between passion and technique.

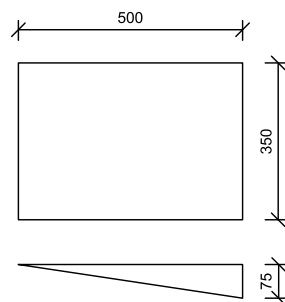

Integrated washbasins

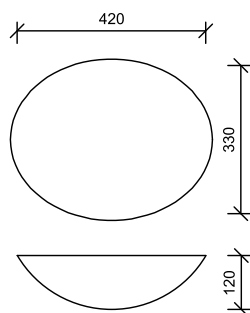

Wave

A close-up photograph of a modern, white, oval-shaped ceramic sink. The sink is set into a white countertop. A sleek, chrome faucet is positioned at the top left of the sink. The lighting is soft, creating gentle shadows and highlights on the smooth surface of the sink. The overall aesthetic is clean and minimalist.
